Apple Swift Student Challenge 2026 | Global Winner

EDUCATION

Bachelor of Technology, Computer Science and Engineering

Aug 2023 – May 2027

SRM Institute of Science and Technology (SRMIST), Chennai, India

Coursework: Data Structures & Algorithms, Machine Learning, Deep Learning, NLP, Artificial Intelligence, Probability & Statistics, Linear Algebra, System Design, Operating Systems, DBMS, Computer Networks

TECHNICAL SKILLS

Languages	Python (Primary), Swift, Java, C++, JavaScript, Go, SQL, Bash
AI / ML / DL	PyTorch, TensorFlow, Keras, scikit-learn, YOLOv8, XGBoost, NumPy, Pandas, OpenCV, CUDA, SHAP
NLP / LLM	HuggingFace Transformers, LangChain, OpenAI API, LoRA/QLoRA, Prompt Engineering, Tokenization, RLHF
RAG & Search	FAISS, ChromaDB, Semantic Chunking, BERTScore, Cosine-Similarity Retrieval, Vector Indexing
iOS Dev	SwiftUI, UIKit, CoreMotion, ARC, MVVM, SwiftData, Xcode, Instruments, TestFlight
Cloud & Tools	Firebase, Docker, AWS (EC2, S3), Oracle Cloud, FastAPI, REST APIs, Git, CI/CD, Linux, Postman, W&B

EXPERIENCE

Software Engineer Intern | iOS & Systems

April 2025 – May 2026

iOS Dev Centre, Infosys x Apple, SRMIST, Chennai, India

- Selected in the **top 4%** (100 of 3,000+ applicants) for Apple's partnered engineering programme; evaluated on Swift, OOP, system design, and production code quality.
- Apple Swift Student Challenge 2026 Global Winner:** built **AXIS**, a real-time sensor-driven iOS app using CoreMotion API; selected among **~350 winners** from **50,000+ global submissions** for scalable architecture and end-to-end product ownership.
- Architected **Rentiwise (Live on Apple App Store)**: engineered a high-performance peer-to-peer rental platform with REST API pipeline, Supabase real-time sync, in-memory caching, and async/await networking, **reducing data-fetch latency by 35%** while sustaining **60 fps** UI performance.
- Built reusable component libraries and protocol-oriented design patterns, cutting design-to-code iteration by **30%** and establishing scalable, maintainable code practices at production scale.

iOS Developer Intern

Feb 2026 – Mar 2026

Infosys (Fleet Management Systems), Mysore, India

- Designed and shipped a **Fleet Management System** with real-time vehicle tracking, driver-assignment workflows, route management, and live dashboards; **ranked #1 company-wide** across all intern submissions for architecture, reliability, and feature depth.
- Delivered **3 production-ready features in 48 hours** meeting a critical release deadline; cleared full QA review with **zero post-release defects**, demonstrating high-velocity execution and ownership under pressure.
- Collaborated with Product, QA, and Design in an **Agile sprint environment** (Scrum) for scoping, technical decision-making, and cross-functional delivery.

AI / ML Engineer Intern

Sep 2024 – Mar 2025

Infosys Springboard, Remote

- Trained and deployed ML models in PyTorch with hyperparameter optimisation (Optuna, GridSearchCV) and k-fold cross-validation, improving F1 score by **12%**; built automated data pipelines reducing manual processing by **40%**.

KEY PROJECTS

DriftShield: LLM Semantic Evaluation & RAG Pipeline (Peer-Reviewed) | Python, HuggingFace, BioBERT, FAISS, OpenAI API, FastAPI

- Co-authored **peer-reviewed NLP research** on LLM semantic consistency; built a full **RAG pipeline** (semantic chunking, BioBERT embeddings, FAISS vector indexing, cosine-similarity retrieval) to detect alignment drift in GPT-4, Llama-2, and Mistral.
- Fine-tuned drift detector using HuggingFace Trainer API with automated **BLEU and BERTScore evaluation**; achieved **18% false-positive reduction** with fully reproducible experiment tracking.

Eva Guardian: Real-Time Object Detection System | Python, PyTorch, YOLOv8, CUDA, OpenCV, FastAPI

- Trained custom YOLOv8 on 2,500+ annotated images with **CUDA-accelerated GPU training**; achieved **94% mAP@0.5** at 28 FPS with modular inference pipeline, data augmentation (mosaic, mixup, HSV jitter), and structured **FastAPI** backend.

Self-Pruning Neural Network with Learned Sparsity | Python, PyTorch, NumPy

- Designed a **PrunableLinear layer** with learnable sigmoid gates and L1 sparsity regularisation; achieved **91.3% weight sparsity** (3.47M of 3.8M parameters pruned) with only 2.6% accuracy loss on CIFAR-10, **11.5x parameter compression**.

OncoVision: Lung Cancer Detection CNN | TensorFlow, Keras, OpenCV, Transfer Learning

- Custom CNN achieving **90% accuracy** on histopathological CT scans; applied transfer learning with fine-tuned ResNet-50 weights, reducing training time by **35%** while maintaining accuracy through data augmentation and class-imbalance correction.

LEADERSHIP & COMMUNITY

- Associate Head, Content, Placfv's:** Led end-to-end placement communications for 50+ enterprise recruiters; built content pipelines reducing recruiter response turnaround by **40%**.
- Committee Head, Aaruush, SRM University:** Managed event logistics and cross-team coordination for one of India's largest national-level technical festivals.
- AI Research Communicator (X/Twitter):** Authored **200+ technical breakdowns** of NLP/ML papers covering LLMs, CV, Mechanistic Interpretability; tracking frontier AI research.

ACHIEVEMENTS & CERTIFICATIONS

- Apple Swift Student Challenge 2026** | Global Winner (~350 selected from 40,000+ submissions worldwide); recognised by Apple engineers.
- Guidewire Hackathon** | **Top 6 out of 5,000+ teams**; demonstrated rapid prototyping and end-to-end solution delivery under time constraints.
- Google CodeClash 2.0** | **Ranked Top 13 out of 1,300+ teams** in the national-level Google-organised competitive programming hackathon.
- Smart India Hackathon 2024** | National Participant (Government of India flagship innovation challenge).
- Oracle:** Generative AI Professional, AI Foundations | **NVIDIA:** Deep Learning | **Salesforce:** Agentforce Specialist | **SAP:** Gen AI Developer
